Cybercrime, Cyberterrorism, and Cyberwar

Course Introduction

Juan Tapiador

uc3m

Who am I?

professor at UC3M | security, privacy, Internet measurements

<https://0xjet.github.io>

What is this course about?

Gentle, not very technical introduction to various key security and privacy topics, including

- some bits of history,
- opponents and the current cyberthreat landscape,
- the underground economy of cybercrime,
- vulnerabilities, exploits, and their market,
- surveillance—including commercial surveillance—and
- cyberwarfare.

Why this course?

To provide you with a socio-techno-economic perspective of current security & privacy phenomena in the Internet, how did we get here, and what might be done about it.
